family cannon. Oh, and watch where you sit, Grandpa's lost his teeth again. Welcome to the Robinson's.

This unique book closes the gap between psychology books and the research that made them possible. Its journey through the "headline history" of psychology presents 40 of the most famous studies in the history of the science, and subsequent follow-up studies that expanded their findings and relevance. Readers are granted a valuable insider's look at the studies that continue to be cited most frequently, stirred up the most controversy when they were published, sparked the most subsequent related research, opened new fields of psychological exploration, and changed most dramatically our knowledge of human behavior. For individuals with an interest in an introduction to psychology.

The book's focus is basic chemistry, but along the way it branches out into full-length chapters/appendices on particle physics, mathematics, information theory, probability and philosophy-of-science. In the end, it is more philosophical treatise than chemistry text, although it does include a number of hands-on kitchen chemistry experiments, as an integral part of the advocated philosophy.
