Automation Testing Tutorial Automated
Software Testing For DoD~~

The concept of automating the testing of software-intensive systems has been around for decades, but the practice of automating testing is scarce in many industries, especially in the government defense sector. A one-year project initiated by the Office of the Secretary of Defense (OSD), Scientific Test and Analysis Techniques Center of Excellence (STAT COE) and sponsored by Navy OPNAV N94 set out to:

~~Test & Evaluation Management Guide~~
DOD-STD-2167A (Department of Defense Standard 2167A), titled "Defense Systems Software Development", was a United States defense standard, published on February 29, 1988, which updated the less well known DOD-STD-2167 published 4 June 1985. This document established "uniform requirements for the software development that are applicable throughout the system life cycle."

~~Defense Innovation Board Ten Commandments of Software~~

Reduced testing time and manpower:
Automated tests run significantly faster than manual tests, are less labor-intensive, and provide the capability to verify thousands to millions of test permutations in minutes to hours. For our DOD customers, this translates to accelerating the delivery of capability to the warfighter.

Cost savings: Automation can markedly reduce the costs involved in producing first-rate software. Savings result from not only reduced test time and manpower but also from ...

plan, develop, build, test, release, deliver, deploy, operate, and monitor. In DevSecOps, testing and security are shifted to the left through automated unit, functional, integration, and security testing - this is a key DevSecOps differentiator since security and functional capabilities are tested and built simultaneously.

~~DoD Enterprise DevSecOps Reference Design~~

Automated testing is a key part of DevSecOps. It is enabled by multiple tools that measure both test code coverage and test results. They are fully automated and do not require human action. It also enables new concepts like pair programming and peer code review.
