Manga Anatomy Like You've Never Seen It! You know that manga faces are different from those of regular, American-style comic book characters. But did you know that manga bodies are also different? Well, they are, and Christopher Hart is here, once again, to tell you all about it in his signature accessible style. This book is loaded with clear step-by-step instructions and illustrations, anatomical charts and information, and before-and-after comparisons you won't find anywhere else—all tailored to creating authentic Japanese-style manga. And in addition to the breakdowns of the various sections of the body, you'll also learn how all the different elements—including faces and costumes—come together to form complete characters. Basic Anatomy for the Manga Artist contains everything you need to know. No aspiring mangaka (manga artist) should be without it.

This drawing tutorial from best-selling author Christopher Hart shows artists how to draw exaggerated musculature of super-sized figures in action poses.

Got manga? Christopher Hart's got manga, and he wants to share it with all his millions of readers—especially the beginners. With Manga for the Beginner, anyone who can hold a pencil can start drawing great manga characters right away. Using his signature step-by-step style, Hart shows how to draw the basic manga head and body, eyes, bodies, fashion, and more. Then he goes way beyond most beginner titles, exploring dynamic action poses, special effects, light and shading, perspective, popular manga types such as animals, anthros, and shoujo and shounen characters. By the end of this big book, the new artist is ready to draw dramatic story sequences full of movement and life.

Focusing on anatomy, one of the fundamentals of drawing manga characters, Anatomy 101 teaches readers how to accurately draw the manga figure. From lessons on muscular and skeletal structure, arms, hands, and feet to poses and movement, this book covers everything readers need to go from manga fans to manga artists. After an introduction to these elements, readers will have a chance to follow along Hart's in-depth step-by-steps, and will even be invited to draw on their own, right in the book's pages.

Presents a guide to stylized figure anatomy for artists wishing to emulate one of today's popular streamlined comic book styles, with step-by-step demonstrations and studies of major muscle groups, heads, hands, and feet.

In this book, the body is covered head-to-toe—from various angles and positions with versions for men, women and children all provided. How to Create Manga: Drawing the Human Body is a must-have for budding manga artists and an essential reference for experienced artists looking to hone their ability to draw certain parts of their characters with greater accuracy. Tuttle's How to Create Manga series guides users through the process of reaching a professional-looking final drawing through actual sketch progressions, practical tips and common missteps to avoid. Other books in the series include How to Create Manga: Drawing Facial Expressions, How to Create Manga: Drawing Clothing and Accessories and How to Create Manga: Drawing Action Scenes and Characters.

From head to toe, the human form, in all its complexities, is visually simplified to such a degree in this remarkable workbook that even complete beginners will soon be able to draw accurate, well-proportioned faces and figures every time they try. Avoiding complex charts of muscles and bones that are more helpful to doctors than to artists, this book's refreshing approach teaches anatomy from a cartoonist/illustrator's point of view. For example, there are many large and small muscles in the neck, all rendered in great detail in most anatomy books, but here, master teacher Christopher Hart shows only the four that are visible and need to be drawn. His clear instruction helps readers to visualize and portray shifting body weight in a pose without the need of a model, and instead of showing a mass of facial muscles and bones, he translates them into the simple planes an artist needs to draw a range of expressive faces.
