testing and evaluating  
intelligent systems.

Topics include:

intelligent system design,  
training and evaluation,  
decision trees, rule based  
systems, Bayesian  
learning, Support Vector  
Machines, neural  
network systems, and  
fuzzy systems.

~~Intelligent Systems in  
Engineering Applications~~

*Page 29/36*

PDF Electrical

Researchers in intelligent systems develop ways for systems to learn and adapt to changing circumstances without the intervention of an operator. Research in these fields encompass a large number of activities and can range from theoretical to large-scale practical applications.
