The Boeing B-17 was the first mass-produced, four-engine heavy bomber. Used throughout World War II for strategic bombing, the plane earned a reputation for its toughness and versatility. Carrying a crew of ten, and 8,000 pounds of bombs on long range missions, the '17 wreaked havoc on Germany during the critical years 1942-45. The ""Memphis Belle,"" the first B-17 to fly 25 missions over Europe, is perhaps the most famous plane to emerge from the European Theatre. Originally printed by the United States Army Air Force in December of 1942, the B-17 Bomber Pilot's Flight Operating Manual taught pilots everything they needed to know about the "Queen of the Skies." Originally classified "Restricted," the manual was declassified long ago and is here reprinted in book form. This affordable facsimile has been reformatted, and color images appear as black and white. Care has been taken however to preserve the integrity of the text.

When the Boeing 747 first flew commercially in 1970, it ushered in a new era of affordable air travel. Often referred to by the nickname " Jumbo Jet, " the 747 was the world ' s first wide-body commercial airliner, and its advent has proved to be one of the major milestones in aviation history. The centerpiece of this Haynes Manual is the 747-400, which is the most numerous version. As well as being the bestselling model in the 747 family, there are more

400s currently in service than any other model of this mighty jumbo.

A vital resource for pilots, instructors, and students, from the most trusted source of aeronautic information.

On 25 February 2009 a Boeing 737-800, flight TK1951, operated by Turkish Airlines was flying from Istanbul in Turkey to Amsterdam Schiphol Airport. There were 135 people on board. During the approach to the runway at Schiphol airport, the aircraft crashed about 1.5 kilometres from the threshold of the runway. This accident cost the lives of four crew members, and five passengers, 120 people sustained injuries. The crash was caused by a malfunctioning radio altimeter and a failure to implement the stall recovery procedure correctly.

On 1 January 2007, a Boeing 737-4Q8, operated by Adam Air as flight DHI 574, was on a flight from Surabaya, East Java to Manado, Sulawesi, at FL 350 (35,000 feet) when it suddenly disappeared from radar. There were 102 people on board.. Nine days later wreckage was found floating in the sea near the island of Sulawesi. The black boxes revealed that the pilots were so engrossed in trouble shooting the IRS that they forgot to fly the plane, resulting
