This must-read guide offers a practical and engaging introduction to the ins and outs of R&D leadership. Innovation is a two-trillion-dollar industry, and, on top of the baseline complexity faced by any manager, the R&D or Innovation leader confronts an additional set of challenges. Armed with years of experience in roles ranging from scientist to Vice President of R&D to founder of his own company to innovation career coach, Dr. Clifford L. Spiro shares his insights on a carefully curated selection of topics. This indispensable playbook covers: Building, managing, and motivating a team Setting schedules and goals Assessing and rewarding project success Working with other departments Legal and intellectual property considerations Dr. Spiro's distinctive blend of big-picture strategic thinking and day-to-day, nitty-gritty tips (e.g., Five Great Questions For R&D Managers to Ask Every Time) is essential reading for current and aspiring R&D leaders through seasoned managers as well as anyone at an organization that has an R&D, innovation, or technology transfer component. Providing a prescriptive, in-the-trenches assessment of how to lead innovation more effectively, this book ably equips the reader to anticipate potential problems and to succeed both within the R&D department and across his or her company.

An inspirational, motivational book that chronicles Michael MacDonald's transformation from a scholarship player at Rutgers' high-level Division I basketball program to a highly successful executive at Xerox and then chairman and CEO of Medifast. "From the Bench to the Boardroom, Michael MacDonald shares his journey from his college basketball career at Rutgers to executive positions at Xerox and Medifast. His leadership, work ethic, and persistence, which were on display every step of the way, have made him a valued member of our board at the Jimmy V Foundation." —Mike Krzyzewski, Naismith Hall of Fame coach, Duke University "Mike holds a deep reverence and appreciation for his time at Rutgers, as well as for the opportunities that Rutgers has provided him. As a letterwinner on the Rutgers men's basketball teams in the 1970s, Mike took his student-athlete experience and translated these learned lessons to successes in his career.... His time as a Rutgers student-athlete, alumnus, board member, donor, and father/father-in-law of three Rutgers alumni continues to leave an indelible legacy on our alma mater. I am proud to call him not only a great teammate, but an even better friend." —Marco Battaglia, Rutgers Football All-American and Cincinnati Bengals Player "I believe the combination of an excellent education and participation in highly competitive sports programs provides invaluable preparation for life after school is over. The best sources of knowledge about the benefits of such a background are people who have been there. Mike MacDonald fits the bill. And he is particularly well suited to write about his experiences because of an amazing ability to recollect the details of his formative years. A student athlete at Rutgers, he was part of the school's then outstanding basketball team. He went on to use this and similar pre-college experiences to build an exceptional business career. That's part of his story but those of us who know him well would add that he is the epitome of a 'good man.' I have seen him close up with family, friends, and others for years. He is a great husband, dad, and grandfather, kind and generous, enthusiastic, and always on the go. You will enjoy what he has to say." —Gene Renna, Retired Senior Executive, Exxon Mobil "Mike MacDonald represents the absolute best of Rutgers University and is an inspiration to everyone on campus. From the day I met Mike, he has always made himself available to mentor, guide, and motivate both our student-athletes and our coaching staff. As an alumnus, he has given back generously and led the charge in ensuring that Rutgers continues to be a beacon of higher education. I've always admired his ability to juggle the roles of family man, businessman, and leader in the Rutgers community. His path from Rutgers is a shining example for student-athletes of the future. He has succeeded in every aspect of life and continues to give back to the community that molded him. To give Mike MacDonald the ultimate compliment a coach can give, simply put, he is a winner." —Steve Pikiell, Head Men's Basketball Coach, Rutgers University

This is the remarkable story of a country boy born in Northumberland in 1920, who, following an elementary education in the counties of Northumberland and Durham, left school aged fourteen years. However by the time he retired in 1982 he was considered to be one of the world's leading aircraft accident investigators and air safety advisors.

In *Team-Building: From the Bench to the Boardroom*, veteran basketball coach Pat Sullivan takes the lessons he learned during forty-four years of successfully building athletic teams to teach business leaders practical skills in business management. With an emphasis on the benefits of team-building, Pat shows how managing teams in the workplace is no different from managing teams on the basketball court - and that in either venue, you can build winning teams using twenty core concepts. He explores the principles of good athletic management - such as setting clear expectations, dealing with failure, and listening to the team- and teaches you how to apply those concepts in the workplace, taking care to acknowledge different business leadership styles and encouraging more managers to reflect on their own team building philosophies and policies. *Team-Building: From the Bench to the Boardroom* will be an insightful, practical addition to any collection of team building books for work.

#3 New York Times Advice/How-To Bestseller #7 Wall Street Journal Nonfiction Bestseller "This book is game changing in a way I have never seen in a business book. I learned about myself and gained new insights into the work I've been doing for thirty years. It is a spectacular read." — John Riccitiello, CEO, Electronic Arts This is not a management book. This is a book for managers. Ever have the feeling that no matter how rewarding your job is that there's an entirely different level of success and fulfillment available to you? Linger in the mist, just out of reach... There is, and Stan Slap is going to help you get it. You hold in your hands the book that entirely redraws the potential of being a manager. It will show you how to gain the one competency most critical to achieving business impact, but it won't stop there. This book will put a whole new level of meaning into your job description. You will never really work for your company until your company really works for you. *Bury My Heart at Conference Room B* is about igniting the massive power of any manager's emotional commitment to his or her company-worth more than financial, intellectual and physical commitment combined. Sometimes companies get this from their managers in the early garage days or in times of tremendous gain, but it's almost unheard of to get it on a sustained, self-reinforced basis. Of course your company is only going to get it if you're willing to give it. Slap proves that emotional commitment comes from the ability to live your deepest personal values at work and then provides a remarkable process that allows you to use your own values to achieve tremendous success. This is not soft stuff; it is the stuff of hard-core results. *Bury My Heart at Conference Room B* is the highest-rated management development solution at a number of the world's highest-rated companies—companies that don't include "patience" on their list of corporate values. It has been exhaustively researched and bench tested with tens of thousands of real managers in more than seventy countries. You'll hear directly from managers about how this legendary method has transformed their careers and their lives. As Big as It Gets Stan Slap is doing nothing less than making the business case for a manager's humanity-for every manager and the companies that depend on them. *Bury My Heart at Conference Room B* gives managers the urgency to change their world and the energy to do it. It will stir the soul, race the heart, and throb the foot used for acceleration. *Buckle Up. We're Going Off-Road.* Slap is smart, provocative, wickedly funny and heartfelt. He fearlessly takes on some of the most cherished myths of management for the illogic they are and celebrates the experience of being a manager in all of its potential and potential weirdness. And he talks to managers like they really talk to themselves.

Based on a viral article, the gripping medical mystery story of Ron Davis, a world-class Stanford geneticist who has put his career on the line to find the cure for chronic fatigue syndrome, the disease killing his son. For the past six years, Whitney Dafoe has been confined to a bedroom in the back of his parents' home, unable to walk, to eat, to speak. The sound of music causes him pain. At one point, the formerly healthy, young, freelance photographer, faced starvation as his 6'3" frame withered to 115 pounds. In desperation, Whitney and his parents went from one specialist to another, and still no answers. Then, finally, a diagnosis: the mysterious disease myalgic encephalomyelitis or chronic fatigue syndrome (ME/CFS). Whitney's story is heartbreaking, but it's also one of redemption. It reaches far beyond just one family's harrowing tale. Today, ME/CFS affects between 1 and 2.5 million Americans--and 20 million people around the world. Those afflicted largely suffer in silence because the disease is little known and much misunderstood. The question lingers still whether it even exists outside the patient's mind. Often disbelieved, they're abandoned by family and friends. They lose their jobs, and battle with insurance companies over rising medical costs as the chronic disease continues on year after year. In one way, Whitney has been lucky. He could reach out to his father, a world renowned, scientist, for answers. This book is the story of one father's desperate hunt for the insidious illness that stole his son away. *The Puzzle Solver* follows Ron as he unravels the molecular trail within his own son's donated blood and genome, to began to find

answers. He confirms this is a biological disease and uncovers new possibilities for treatments and potentially a cure. At its heart, The Puzzle Solver is about more than just cutting edge research or a race to find the cure for ME/CFS--it's about the unbreakable bond between a father and his son, and the lengths to which a parent will go to save their child's life.

There is a major demand for people with scientific training in a wide range of professions based on and maintaining relations with science. However, there is a lack of good first-hand information about alternative career paths to research. From entrepreneurship, industry and the media to government, public relations, activism and teaching, this is a readable guide to science based skills, lifestyles and career paths. The ever-narrowing pyramid of opportunities within an academic career structure, or the prospect of a life in the laboratory losing its attraction, mean that many who trained in science and engineering now look for alternative careers. Thirty role models who began by studying many different disciplines give personal guidance for graduates, postgraduates and early-career scientists in the life sciences, physical sciences and engineering. This book is an entertaining resource for ideas about, and directions into, the many fields which they may not be aware of or may not have considered.
