The paper reports the information management practices of the various key stakeholders during the inspection stage of a construction project. The data was collected through observations and shadowing of stakeholder exemplars, interviews and document analysis over a fourteen-week period. In the process of constructing a new and innovative academic building for an Australian University, vast ...

Lack of congruence can create its own set of stakeholder problems. This occurs when a group of stakeholders — volunteers for example — have a different set of values than other stakeholders, such as management.

~~Problems With Stakeholders | Bizfluent~~

DHS defines a threat as a natural or man-made occurrence, individual, entity, or action that has or indicates the potential to harm life, information, operations, the environment and/or property. An incident, according to DHS, is an occurrence, caused by either human action or natural phenomena, that may cause harm and that may require action. In healthcare, sharing information is vital to the security and safety of the sector, and stakeholders within the sector.

Ensuring the security and resilience of the nation's critical infrastructure is a shared responsibility among multiple stakeholders because neither government nor the private sector alone has the knowledge, authority, or resources to do it alone. Public-private partnerships are the foundation for effective critical infrastructure security and resilience strategies, and timely, trusted information sharing among stakeholders is essential to the security of the nation's critical infrastructure.

~~Critical Infrastructure Partnerships and Information Sharing~~

Stakeholders do not equally trust all sources of information about health and safety. In situations where different messages are received from different sources, stakeholders will respond to the messages from the more credible source and discount the messages from the other sources.
