How China Became Capitalist details the extraordinary, and often unanticipated, journey that China has taken over the past thirty five years in transforming itself from a closed agrarian socialist economy to an indomitable economic force in the international arena. The authors revitalise the debate around the rise of the Chinese economy through the use of primary sources, persuasively arguing that the reforms implemented by the Chinese leaders did not represent a concerted attempt to create a capitalist economy, and that it was 'marginal revolutions' that introduced the market and entrepreneurship back to China. Lessons from the West were guided by the traditional Chinese principle of 'seeking truth from facts'. By turning to capitalism, China re-embraced her own cultural roots. How China Became Capitalist challenges received wisdom about the future of the Chinese economy, warning that while China has enormous potential for further growth, the future is clouded by the government's monopoly of ideas and power. Coase and Wang argue that the development of a market for ideas which has a long and revered tradition in China would be integral in bringing about the Chinese dream of social harmony.

“ If you are curious and open to the life around you, if you are troubled as to why, how and by whom political power is held and used, if you sense there must be good intellectual reasons for your unease, if your curiosity and openness drive you toward wishing to act with others, to ‘ do something, ’ you already have much in common with the writers of the three essays in this book. ” — Adrienne Rich With a preface by Adrienne Rich, Manifesto presents the radical vision of four famous young rebels: Marx and Engels ' Communist Manifesto, Rosa Luxemburg ' s Reform or Revolution and Che Guevara ' s Socialism and Humanity.

Afterlives of Chinese Communism comprises essays from over fifty world-renowned scholars in the China field, from various disciplines and continents. It provides an indispensable guide for understanding how the Mao era continues to shape Chinese politics today. Each chapter discusses a concept or practice from the Mao period, what it attempted to do, and what has become of it since. The authors respond to the legacy of Maoism from numerous perspectives to consider what lessons Chinese communism can offer today, and whether there is a future for the egalitarian politics that it once promised.

This book covers the whole system of Socialism with Chinese Characteristics, dealing with Deng Xiaoping's theory, the socialist market economy, a moderately well-off (Xiaokang) society, China's practice and theory of socialist democracy, human rights, and Xi Jinping's Marxism. In short, the resolute focus is the Reform and Opening-Up. Socialism with Chinese Characteristics is one of the most important global realities today. However, the concept and its practice remain largely misunderstood outside China. This book sets to redress such a lack of knowledge, by making available to non-Chinese speakers the sophisticated debates and conclusions in China concerning socialism with Chinese Characteristics. It presents this material in a way that is both accessible and thorough.

Perhaps the most influential and widely read political work of the 19th century, Karl Marx and Friedrich Engels' *The Manifesto of the Communist Party* succinctly lays out the political theory and history of class struggle. Following a short introduction, the *Manifesto* develops over four short chapters, discussing the historical background of class struggle, the relationship of Communists with other socialist and working class movements, a critical review of other contemporary socialist literature and thinking, and finally a brief summary of the Communist position related to the contemporary political situations in various European countries, concluding with the rousing call-to-arms, "Workingmen of all countries unite!" This edition, translated by Samuel Moore, includes Engels' own Preface and footnote annotations written for the English edition of 1888. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

This collection of documents covers the rise to power of the Chinese communist movement. They show how the Chinese Communist Party interpreted the revolution, how it devised policies to meet changing circumstances and how these policies were communicated to party members and public.

Two of the most stylized shots in cinema—the close-up and the long shot—embody distinct attractions. The iconicity of the close-up magnifies the affective power of faces and elevates film to the discourse of art. The depth of the long shot, in contrast, indexes the facts of life and reinforces our faith in reality. Each configures the relation between image and distance that expands the viewer's power to see, feel, and conceive. To understand why a director prefers one type of shot over the other then is to explore more than aesthetics: It uncovers significant assumptions about film as an art of intervention or organic representation. *Close-ups and Long Shots in Modern Chinese Cinemas* is the first book to compare these two shots within the cultural, historical, and cinematic traditions that produced them. In particular, the global revival of Confucian studies and the transnational appeal of feminism in the 1980s marked a new turn in the composite cultural education of Chinese directors whose shot selections can be seen as not only stylistic expressions, but ethical choices responding to established norms about self-restraint, ritualism, propriety, and female agency. Each of the films discussed—Zhang Yimou's *Red Sorghum*, Ang Lee's *Lust, Caution*, Hou Hsiao-Hsien's *The Assassin*, Jia Zhangke's *I Wish I Knew*, and Wei Dsheng's *Cape No. 7*—represents a watershed in Chinese cinemas that redefines the evolving relations among film, politics, and ethics. Together these works provide a comprehensive picture of how directors contextualize close-ups and long shots in ways that make them interpretable across many films as bellwethers of social change.

Nov 2020 The State Department plan for confronting the rise of China and sustaining the United States as the world's leading superpower. The blueprint states that "awareness has been growing in the United States - and in nations around the world - that the Chinese Communist Party has triggered a new era of great-power competition" and notes that the Chinese government led by Xi Jinping is "modeled on 20th-century Marxist-Leninist dictatorship." The State Department warns that "the CCP aims ... to fundamentally revise world order, placing the People's Republic of China at the center and serving Beijing's authoritarian goals and hegemonic ambitions." "Meeting the China challenge requires the United States to return to the fundamentals," the State Department asserts. "To secure freedom, America must refashion its foreign policy in light of ten tasks." Why buy a book you can download for free? We print the paperback book so you don't have to. Creating the Intellectual redefines how we understand relations between intellectuals and the Chinese socialist revolution of the last century. Under the Chinese Communist Party, " the intellectual " was first and foremost a widening classification of individuals based on Marxist thought. The party turned revolutionaries and otherwise ordinary people into subjects identified as usable but untrustworthy intellectuals, an identification that profoundly affected patterns of domination, interaction, and rupture within the revolutionary enterprise. Drawing on a wide range of data, Eddy U takes the reader on a journey that examines political discourses, revolutionary strategies, rural activities, urban registrations, workplace arrangements, organized protests, and theater productions. He lays out in colorful detail the formation of new identities, forms of organization, and associations in Chinese society. The outcome is a compelling picture of the mutual constitution of the intellectual and the Chinese socialist revolution, the legacy of which still affects ways of seeing, thinking, acting, and feeling in what is now a globalized China.
