The development of leadership capacities addresses a vital and continuing need in communities and organizations as they attempt to adapt to a wide range of social, economic, environmental, and political changes. Leadership development activities that focus on building new skills and fostering new ideas directly shape local and organizational capacity. At the organizational level, leadership is a valued resource as organizations are faced with challenges of limited resources, funding, and other capacities. Community leadership operates within a different domain; an environment with different dynamics, structures, and goals. Community leadership is distinctive in that leaders often do not have formal training or authority to dictate and facilitate change. Instead, community leaders must rely on informal networks of diverse citizens, each with a unique local capacity, as the basis for change. This book brings together classic and contemporary articles drawn from Community Development. Divided into two sections, the book begins with a range of seminal leadership theory and conceptualization pieces. These have been instrumental in shaping leadership development in a wide range of settings. Following the theory section, a variety of research and application chapters are presented. These chapters operationalize theory through applied research and programming, and provide replicable frameworks for future research and programs. This book is a compilation of articles published in the journal Community Development.

Many authors write about leadership, but few have lived it at the level of Lt. Gen. Rick Lynch. The world is in desperate need of authentic, reliable leaders at all levels of society. Twenty-first-century leaders face unprecedented challenges and rapid change, and leaders with a keen ability to adapt are in high demand. Sharing stories from the front and insights born from overcoming adversity on both the battlefield and in the boardroom, Lynch reveals impactful leadership principles ranging from earning respect and working effectively with diverse teams to adapting to new technology and laying a foundation of trust built upon integrity. With refreshing directness, he shows readers how to make wise calls and gain the confidence they need to lead in our ever-changing world.

The traditional idea of leadership as being about the solo, heroic leader has now run its course. A new way of thinking about leadership is now needed to address major challenges such as achieving greater social responsibility, enhancing leadership capacity and recognising the importance of context as affecting how leadership occurs. Relational leadership offers a new perspective of leadership that addresses these challenges. At its core, relational leadership recognises leadership as centred in the relationships that form between both formal and informal leaders and those that follow them, far more so than the personality or behaviours of individual leaders. This book introduces readers to the most up-to-date research in this area and the differing theoretical perspectives that can help us better understand leadership as a relational phenomenon. Important characteristics of effective leadership relationships such as trust, respect and mutuality are discussed, focusing on how they develop and how they bring about leadership effects. Specific forms of relational leadership such as shared leadership, responsible leadership, global team leadership and complexity leadership are addressed in subsequent chapters. The book is the first to examine recent ideas about how these new forms of relational leadership are put into practice as well as techniques, tools and strategies available to organisations to help do so. The inclusion of three detailed case studies is specifically designed to help readers understand many of the key concepts covered in the book, with key learning points emphasised. The book offers an excellent summary of the state-of-the-art topics in this new and exciting field of relational
