"Managerial styles are influenced by habit, familiarity, and workplace culture. It's no wonder that well-intentioned professionals doing their best to be good organizational leaders often repeat unhelpful supervisory practices experienced in their early careers, even if they disliked them at the time. In the DUH! Book of Management and Supervision, the author disagrees with many accepted leadership principles (unabashedly referring to them as myths) and makes new and different approaches easier to imagine. Her challenging and controversial concepts illustrated with poignant stories suggest common-sense and immediately applicable alternatives more suitable in today's workplace"--Back cover.

The authors of this book explain the differences between managing by the 3-Ps (Proximity, Position, and Persuasion) and the 3-Cs (Clarity, Consistency, and Connectivity). What is Information Governance? Information governance is using the business strategy to apply objectivity, economies, and efficiencies of scale to the processes necessary for the management of information in the achievement of business success. The point of Information or Data Governance is to create TRUSTED data for the business. But how is that actually done? This book is for the individual who is looking for a starting place for establishing a path to better information for their business through a data governance program. The book focuses on describing deliverables and techniques necessary to quantify and measure the Trust of information, including creating dashboards to monitor the success of the Information Management and Governance (IMG) Program as well as an overall Trust Dashboard for the enterprise. If you are trying to answer any of the following questions, then this book can help you out: How do we decrease the number of data silos? How much management and governance is needed for the data? Who owns the data? How do we get the business to trust the data? What measurements can I use to prove the data is good? What do I show

Erwin Scell's professional interests focused on two major concepts in industrial management. Primarily he was intrigued by the problem of synthesis, and labored to coordinate the diverse and sometimes contradictory elements of analysis and action in order to form an integrated overview of management. In direct relation to this, he was concerned with the individual manager's total adjustment to life. His interpretation of policy formulation as the organic outgrowth of managerial approaches to ethical and analytical problems prompted him to stress the absolute necessity of strong moral character to the success of any business. As these writings demonstrate, Professor Schell "sought to bring into clearer perspective the totality of the manager's human experience and responsibility." In the editor's words, "Professor Scell was, above all, a teacher of philosophy... For him, life was an experience in management, and management was a constant challenge to his best thinking and exposition." Editors
