This book introduces piezoelectric microelectromechanical (pMEMS) resonators to a broad audience by reviewing design techniques including use of finite element modeling, testing and qualification of resonators, and fabrication and large scale manufacturing techniques to help inspire future research and entrepreneurial activities in pMEMS. The authors discuss the most exciting developments in the area of materials and devices for the making of piezoelectric MEMS resonators, and offer direct examples of the technical challenges that need to be overcome in order to commercialize these types of devices. Some of the topics covered include: Widely-used piezoelectric materials, as well as materials in which there is emerging interest Principle of operation and design approaches for the making of flexural, contour-mode, thickness-mode, and shear-mode piezoelectric resonators, and examples of practical implementation of these devices Large scale manufacturing approaches, with a focus on the practical aspects associated with testing and qualification Examples of commercialization paths for piezoelectric MEMS resonators in the timing and the filter markets ...and more! The authors present industry and academic perspectives, making this book ideal for engineers, graduate students, and researchers.

This guide to the Joseph Downs Collection of Manuscripts and Printed Ephemera, named for Winterthur's first curator, provides descriptive information for the primary research material held in the collection. The Downs Collection acquires materials from the mid seventeenth century through the twentieth century that document American lifestyles, concentrating on the domestic scene and activities within the household and art. It includes such items as diaries, business accounts of craftsmen whose products decorated dwelling houses, family papers, tax records, construction of homes, artists' sketchbooks, wills and household inventories, children's toys and games, and scrapbooks and journals. Items from individuals famous in American history rest alongside materials from people who led routine

More than 150,000 copies in print! Praise for Scott Meyers' first book, *Effective C++*: "I heartily recommend *Effective C++* to anyone who aspires to mastery of C++ at the intermediate level or above."
– *The C/C++ User's Journal* From the author of the indispensable *Effective C++*, here are 35 new ways to improve your programs and designs. Drawing on years of experience, Meyers explains how to write software that is more effective: more efficient, more robust, more consistent, more portable, and more reusable. In short, how to write C++ software that's just plain better. *More Effective C++* includes:
Proven methods for improving program efficiency, including incisive examinations of the time/space costs of C++ language features
Comprehensive descriptions of advanced techniques used by C++ experts, including placement new, virtual constructors, smart pointers, reference counting, proxy classes, and double-dispatching
Examples of the profound impact of exception handling on the structure and behavior of C++ classes and functions
Practical treatments of new language features, including `bool`, `mutable`, `explicit`, namespaces, member templates, the Standard Template Library, and more. If your compilers don't yet support these features, Meyers shows you how to get the job done without them. *More Effective C++* is filled with pragmatic, down-to-earth advice you'll use every day. Like *Effective C++* before it, *More Effective C++* is essential reading for anyone working with C++.

Wayward Reproductions breaks apart and transfigures prevailing understandings of the interconnection among ideologies of racism, nationalism, and imperialism. Alys Eve Weinbaum demonstrates how these ideologies were founded in large part on what she calls “the race/reproduction bind”—the notion that race is something that is biologically reproduced. In revealing the centrality of ideas about women’s reproductive capacity to modernity’s intellectual foundations, Weinbaum highlights the role that these ideas have played in naturalizing oppression. She argues that attention to how the race/reproduction bind is perpetuated across national and disciplinary boundaries is a necessary part of efforts to combat racism. Gracefully traversing a wide range of discourses—including literature, evolutionary theory, early anthropology, Marxism, feminism, and psychoanalysis—Weinbaum traces a genealogy of the race/reproduction bind within key intellectual formations of the late nineteenth and twentieth centuries. She examines two major theorists of genealogical thinking—Friedrich Nietzsche and Michel Foucault—and unearths the unacknowledged ways their formulations link race and reproduction. She explores notions of kinship and the replication of racial difference that run through Charlotte Perkins Gilman’s work; Marxist thinking based on Friedrich Engel’s *The Origin of the Family*; Charles Darwin’s theory of sexual selection; and Sigmund Freud’s early studies on hysteria. She also describes W. E. B. Du Bois’s efforts to transcend ideas about the reproduction of race that underwrite citizenship and belonging within the United States. In a coda, Weinbaum brings the foregoing analysis to bear on

recent genomic and biotechnological innovations.

"Michael Piggott identifies some broad enduring themes from more than a century of interaction between Hobart and Canberra. This guide offers a sample of the vast resources of files, photos and other material available through the National Archives' website and its reading rooms. Where especially relevant, the guide also points to the collections of other archives such as the Tasmanian Archive and Heritage Office. It includes additional information to help researchers including those undertaking family history, academic and other scholarly investigations, local histories or compiling heritage material. The guide includes an A-Z section of micro stories. They show that more Tasmanian stories can be found using Commonwealth records that have been overlooked for too long or previously unknown."--Back cover.
