In Centuries of Childhood, Ariès made the contentious claim that the concept of childhood is entirely modern, and that within medieval society the idea of childhood did not exist. Further to this, he also made the claim that childhood was not understood as a distinct stage of life until the 15 th century, and prior to this point children were seen merely as ' little adults ' .

The modern concept of family life is traced through the paintings and diaries of the last four centuries

Ariès traces Western man's attitudes toward mortality from the early medieval conception of death as the familiar collective destiny of the human race to the modern tendency, so pronounced in industrial societies, to hide death as if it were an embarrassing family secret. -- Newsweek

This remarkable book—the fruit of almost two decades of study—traces in compelling fashion the changes in Western attitudes toward death and dying from the earliest Christian times to the present day. A truly landmark study, *The Hour of Our Death* reveals a pattern of gradually developing evolutionary stages in our perceptions of life in relation to death, each stage representing a virtual redefinition of human nature. Starting at the very foundations of Western culture, the eminent historian Philippe Ariès shows how, from Graeco-Roman times through the first ten centuries of the Common Era, death was too common to be frightening; each life was quietly subordinated to the community, which paid its respects and then moved on. Ariès identifies the first major shift in attitude with the turn of the eleventh century when a sense of individuality began to rise and with it, profound consequences: death no longer meant merely the weakening of community, but rather the destruction of self. Hence the growing fear of the afterlife, new conceptions of the Last Judgment, and the first attempts (by Masses and other rituals) to guarantee a better life in the next world. In the 1500s attention shifted from the demise of the self to that of the loved one (as family supplants community), and by the nineteenth century death comes to be viewed as simply a staging post toward reunion in the hereafter. Finally, Ariès shows why death has become such an unendurable truth in our own century—how it has been nearly banished from our daily lives—and points out what may be done to “re-tame” this secret terror. The richness of Ariès's source material and investigative work is breathtaking. While exploring everything from churches, religious rituals, and graveyards (with their often macabre headstones and monuments), to wills and testaments, love letters, literature, paintings, diaries, town plans, crime and sanitation reports, and grave robbing complaints, Ariès ranges across Europe to Russia on the one hand and to England and America on the other. As he sorts out the tangled mysteries of our accumulated terrors and beliefs, we come to understand the history—indeed the pathology—of our intellectual and psychological tensions in the face of death.

A critical analysis of *Centuries of Childhood*, in which the French historian Philippe Aries offers a fundamentally fresh interpretation of what childhood is and what the institution means for society at large. Aries's core idea is that ‘childhood,’ as we understand it today – a special time that requires special efforts and resources – is an invention of the 19th century, and that before that date children were in effect thought of as small adults. This led him to a re-evaluation of sources that suggested a second, crucial, conclusion: the idea that these competing visions of childhood were the products of two very different conceptions of human society. An earlier, essentially communal, social ideal, Aries wrote, had been supplanted by a society far more family-centric and hence inward-facing. In his view, moreover, this increased focus on childhood posed a direct challenge to a well-entrenched social order. ‘One is tempted to conclude,’ he wrote, ‘that sociability and the concept of the family were incompatible, and could develop only at each other's expense.’ This revolutionary thesis, which has inspired and infuriated other historians in roughly equal measure, was made possible by Aries's determination to understand the meaning of the evidence available to him and highlight problems of definition that others had simply glossed over, making *Centuries of Childhood* an important example of the critical thinking skill of interpretation.

A revealing study of one of the twentieth century's most original and influential historians; The author of *Centuries of Childhood* and other landmark historical works, Philippe Aries (1914-1984) was a singular figure in French intellectual life. He was both a political reactionary and a path-breaking scholar, a sectarian royalist who supported the Vichy regime and a founder of the new cultural history - popularly known as *l'histoire des mentalités* - that developed in the decades following World War II. In this book, Patrick H. Hutton explores the relationship between Aries's life and thought and evaluates his contribution to modern historiography, in France and abroad. According to Hutton, the originality of Aries's work and the power of his appeal derived from the way he drew together the two strands of his own intellectual life: his enduring ties to the old cultural order valued by the right-wing *Action Française*, and a newfound appreciation for the methodology of the leftist *Annales* school of historians. private life that eventually won him a wide readership and in late life an appointment to the faculty of the prestigious *Ecole des Hautes Etudes en Sciences Sociales*. At the same time, he fashioned himself as a man of letters in the intellectual tradition of the *Action française* and became a perspicacious journalist as well as a stimulating writer of autobiographical memoirs. In Hutton's view, this helps explain why, more than any other historian, Philippe Aries left his personal signature on his scholarship.

Colin Heywood's classic account of childhood from the early Middle Ages to the First World War combines a long-run historical perspective with a broad geographical spread. This new, comprehensively updated edition incorporates the findings of the most recent research, and in particular revises and expands the sections on theoretical developments in the 'new social studies of childhood', on medieval conceptions of the child, on parenting and on children's literature. Rather than merely narrating their experiences from the perspectives of adults, Heywood incorporates children's testimonies, 'looking up' as well as 'down'. Paying careful attention to elements of continuity as well as change, he tells a story of astonishing material improvement for the lives of children in advanced societies, while showing how the business of preparing for adulthood became more and more complicated and fraught with emotional difficulties. Rich with evocative details of everyday life, and providing the most concise and readable synthesis of the literature available, Heywood's book will be indispensable to all those interested in the study of childhood.
