agriculture of the American and Canadian prairies during the 1930s; severe drought and a failure to apply dryland farming methods to prevent the aeolian processes (wind erosion) caused the phenomenon.

Dust Bowl - Wikipedia

The Dust Bowl was a natural disaster that devastated the Midwest in the 1930s. It was the worst drought in North America in 1,000 years. 1 Unsustainable farming practices worsened the drought's effect, killing the crops that kept the soil in place. When winds blew, they raised enormous clouds of dust.

Dust Bowl: Definition, Causes, When, Where, Effect, Map

The Dust Bowl was the name given to an area of the Great Plains (southwestern Kansas, Oklahoma panhandle, Texas panhandle, northeastern New Mexico, and southeastern Colorado) that was devastated by nearly a decade of drought and soil erosion during the 1930s. The huge dust storms that ravaged the area destroyed crops and made living there untenable.

The Dust Bowl was a time of hardship and environmental and economic disaster. More than 100 million acres of land had turned to dust, causing hundreds of thousands of people to seek new homes and opportunities thousands of miles away, while millions more chose to stay and battle nature to save their land. FDR's army of photographers took to the roads to document this nation.

The Impact of the Dust Bowl on the Environment

Technically, the driest region of the Plains – southeastern Colorado, southwest Kansas and the panhandles of Oklahoma and Texas – became known as the Dust Bowl, and many dust storms started there. But the entire region, and eventually the entire country, was affected. The Dust Bowl got its name after Black Sunday, April 14, 1935.
